**SAFEGUARD TECHNOLOGY CONTINUED GROWTH RESULTS IN ACQUISITION
OF NEW MANUFACTURING FACILITY**

CHAGRIN FALLS, OHIO, USA, January 23, 2009 — Safeguard Technology Inc., a world leader in manufacturing slip prevention products since 1992, has finalized acquisition of a new corporate office and manufacturing facility in nearby Streetsboro, OH. The company plans to commence operations at the new facility in March of 2009.

The new 20,500 square foot facility provides Safeguard with the necessary capacity to meet increased demand, enhance quality, reduce lead times for customers, and streamline manufacturing processes.

According to Merv Litzow, Safeguard Technology President, "We have simply outgrown our current facility. This move is critical to the future of Safeguard Technology. Not only will the new building strengthen our position as one of the world's premier manufacturers of slip prevention products, but it will allow us to expand our workforce, thus strengthening the economy in Northeast Ohio. In addition, the extra acreage allows for further expansion to meet future manufacturing requirements."

Safeguard Technology announces Purchase of New Facility - 2

The new building is symbolic of Safeguard's commitment to its present and future employees, as well as the company's long-term desire to insure pedestrian and worker safety throughout the world.
