Anti-Slip Hi-Traction® PUBLIC & PRIVATE TRANSPORTATION

SAFEGUARD® Hi-Traction® for all areas of Transportation
Keep passengers, pedestrians, operators and employees safely upright on land and sea.

Many passenger transportation accidents occur at the vehicle entry and exit areas where hazardous conditions cause slips and falls. SAFEGUARD® Hi-Traction® Covers enhance vehicle safety, reduce liability exposure and lower your operating costs.

Safeguard® Anti-Slip Covers are a much better investment, outlasting and outperforming temporary tapes, paints and rubber flooring which quickly wear down and become slippery. Safeguard® Covers also have excellent chemical, UV and corrosion resistance.

Coefficient of Friction

Safeguard Technology's unique surface nearly doubles both the OSHA's 0.5 and the ADA's 0.6 guidelines for Coefficient of Friction values as confirmed in independent lab testing using the Mark II Model of the Brungraber slip tester. Even in wet or oily conditions, our Safety Covers greatly exceed these guidelines.

Base Materials

Safeguard's unique Anti-Slip surface is universal, regardless of what it is bonded to. Choose from a variety of base materials of construction depending on your application. Covers are available in Flexible PVC (vinyl), pultruded FRP composite fiberglass, stainless steel or the SAFEGUARD® surface can be applied directly to customer supplied material.

Trim assemblies can be direct gritted to match coach colors

Direct Gritting

Direct gritting is an option, particularly at the OEM level, when retrofit Covers are not desirable. If you already have finished parts but do not want to adhere or screw our Cover over them, your parts can be shipped directly to Safeguard where the Anti-slip surface is bonded directly.

Colors

Safeguard offers a wide range of standard colors including the glo-series of photoluminescent "Glow-in-the-dark" pigments. Custom color matching is also available. Colors can be combined for a two-tone configuration for additional safety, such as stair or walkway edges.

Safeguard® Walkway Cover on passenger Ferry loading ramp

Safeguard® Descriptive Messaging on train steps

Descriptive messaging and Logos

Make a statement, point the way to an emergency escape route or display your company's logo. We can incorporate logos, escape route information and directional markings on our Covers. Our SAFEGUARD® Descriptive Marking is inlaid and will last for the lifetime of the product.

Installation

Safeguards non-load bearing Covers are manufactured for installation over existing surfaces. Installation is relatively quick, with little downtime. Safeguard provides a complete range of fastening accessories, as well as technical drawings for installation. Choose from Mechanical Fasteners (screws), Adhesive, or PSA (Pressure Sensitive Adhesive).

Common Applications

- Step Covers - Vehicle & Station Steps
- Walkway Covers - Passenger/Boarding Ramps and Walkways
- Flexible PVC Vinyl - Available with PSA (Pressure Sensitive Adhesive) on Wheelchair Ramps and Lifts
