Protect Your Patrons & Employees

When the main goal is to provide an exceptional experience, safety is no longer a priority - it's a necessity. Slip and fall incidents not only pose a threat to the well-being of guests and employees but can also impact the reputation and bottom line of your establishment. For over 30 years Safeguard Technology has been manufacturing the most durable anti-slip solutions to address the most common areas of slip and fall risks in the hospitality industry. Examples Include:

- Loading docks and delivery entrances
- Guest entrance areas
- Shower, spa and pool areas
- Kitchens
- Ramps and walkways
- Ladder access points
- Mechanical rooms with pipes and wires
- Dimly lit storage areas

Product Features

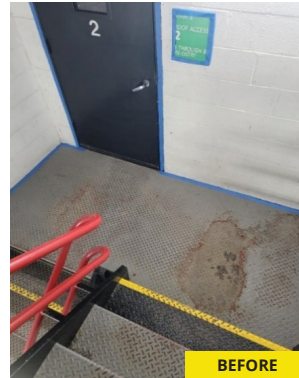

The all-around smart safety investment to replace temporary and substandard tapes, paints, and mats that corrode, requiring routine replacement and provide little benefit in wet and oily settings.

- Custom sized to fit your steps, walkways, and landings
- Available in a range of materials, most notably FRP composite fiberglass; prefabricated for a quick installation over any substrate
- Incredibly durable, able to withstand greasy environments and pressure washer cleaning
- Performs in both excessively hot and cold environments
- Available in a wide array of grits to perform in any condition
- Blend-in to commercial décor or stand-out Hi-Vis colors
- 18 x18 tiles can be configured to any environment

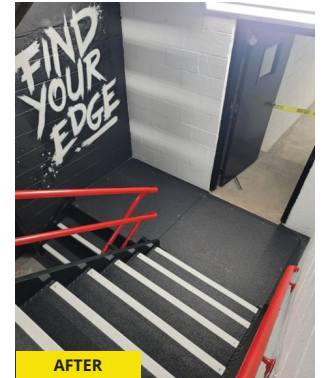

Make A Statement

Take pride in your safety investment with our highly customizable options from incorporating your corporate logos or colors, to photoluminescence (glow-in-the-dark) options in the event the lights go out.
