

Anti-Slip Hi-Traction®  
**LANDING  
COVERS**

**SAFEGUARD**  
TECHNOLOGY  
*Leading Manufacturer of Anti-Slip Safety Products*

### **Safeguard® Landing Covers**

The flexibility of large area coverage with a Walkway Cover, combined with the functionality of a Step Cover to address the leading edge on a step.

# Anti-Slip Hi-Traction® LANDING COVERS

SAFEGUARD® Landing Covers combine the size of a Walkway Cover with the critical “wrap” design of a Step Cover.

## Design.

Designed to provide a seamless Cover on stair landings, these Covers are available in a maximum width of 94” and a depth of 47”. The Landing Covers feature a “└” shaped design to wrap over the leading edge of a step where a majority of slips-and-falls occur.

## Coefficient of Friction

Safeguard Technology's unique surface nearly doubles both the OSHA's 0.5 and the ADA's 0.6 guidelines for Coefficient of Friction values as confirmed in independent lab testing using the Mark II Model of the Brungraber slip tester. Even in wet or oily conditions, our Safety Covers greatly exceed these guidelines.

## Choose Your Grade

We offer 6 different grades of grit, depending on your application. These include Super Coarse (for extreme conditions), Extra Coarse (for offshore and heavy duty use), Coarse (for industrial environments), Fine (for commercial buildings), Extra Fine (for residential steps) and Super Fine (for showers and barefoot areas).

## Choose Your Colors

Select from a wide range of standard, premium, or custom colors. Please refer to our Standard and Premium Colors literature page.

## Two-Tone Colors Add Visibility

For added safety, our two-tone Landing Covers call attention to the edge of the step. A contrast between the step edge and the back of the tread below provides good definition and clear visibility.

## Glow-in-the-dark

Safeguard also offers photoluminescent HiGlo-Traction® Landing Covers which are visible for several hours after the light source is removed.

## Descriptive Markings and Logos

We can incorporate logos, PPE symbols, escape route information, and directional markings on our Covers. Our Safeguard Descriptive Marking is inlaid and will last for the life of the product.

Quickly installed using mechanical fasteners or adhesive.

## Easy Installation and Cleaning

Safeguard® Hi-Traction® Landing Covers are prefabricated, retrofit Covers which are quickly and easily installed over existing surfaces, such as concrete, wood, metal plate and grating using mechanical fasteners or adhesive. Installation is quick, easy and requires little to no downtime. Cleanup is easy with a non-solvent cleaner and a stiff brush. Refer to our cleaning and installation insert for complete details. Safeguard® Hi-Traction® Landing Covers are not load bearing.

## Physical Properties

Please refer to our General Properties insert for complete physical properties and mechanical specifications.

Contact Safeguard Technology for more information or a free sample today.
